# WHITEFLY TRAPS

Also controls Greenfly, Blackfly,  
Thrips, Midges and  
other flying pests

Ideal for use in greenhouses,  
conservatories and glass lean-to's

7  
double sided traps  
with twist ties

Controls Whitefly, Greenfly,  
Blackfly, Thrips, Midges  
and other flying pests without  
the need for pesticides

## HOW IT WORKS

Flying insects are attracted to the bright yellow coloured surface

- Greenhouse pests find the colour irresistible.
- The yellow colour reflects light at the wavelength attractive to Whitefly and other flying pests which become trapped on the sticky surface.
- Strong adhesive- the special no mess formula won't stick to clothing or skin, is non-toxic and has no unpleasant odour.

The product does not contain pesticides and will work continuously which will normally make routine spraying unnecessary.

## INSTRUCTIONS FOR USE

### When and where to use

Use before first signs of pest infestation or in conjunction with other methods of control. For best results use all year round.

### How to use

Peel off the protective backing sheets before hanging just above the plant canopy, using twist ties, string or hooks. Move the panel upwards as plants grow.

### Disposal

To dispose of used traps, wrap in newspaper and put in bin.
